Overview

This JGA25-371 DC gearmotor features an integrated encoder which provides a resolution of 12 counts per revolution, ensuring an accurate control of motor's speed.

Specifications

- Operating voltage: between 6 V and 24 V
- Nominal voltage: 12 V
- Free-run speed at 12 V: 201 RPM
- Free-run current at 12 V: 46 mA
- Stall current at 12 V: 1 A
- Stall torque at 12 V: 2.65 kg·cm
- Gear ratio: 1:21.3
- Reductor size: 19 mm
- Weight: 99 g

For other variations of this motor see the [JGA25-371 gearmotor selector](#).
